The Benchmark for Subscription Analytics

For over a decade, ChartMogul has helped thousands of SaaS companies track billions in recurring revenue. Our analytics and benchmarks define how the SaaS world measures performance – giving founders and operators the insight to grow faster and smarter.

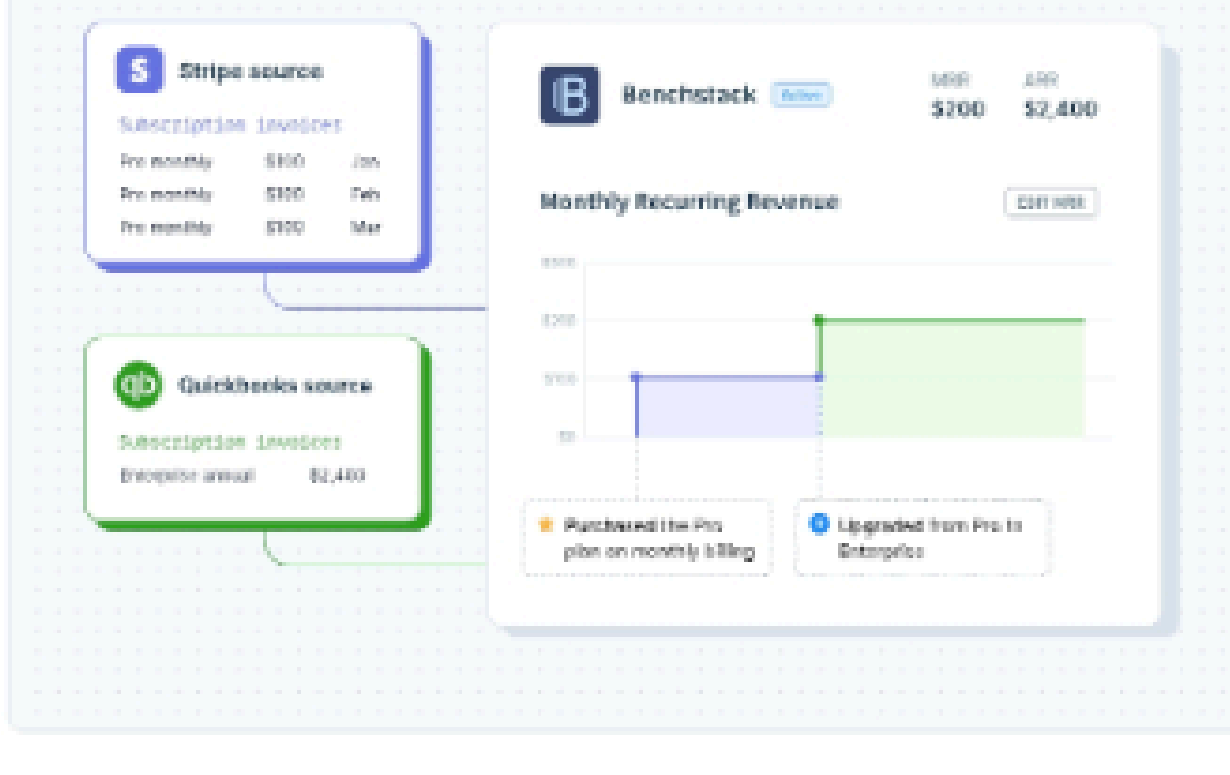

Works with Every Way You Bill

Whether you charge per seat, by tier or usage, or across multiple products, currencies, regions, and payment terms, ChartMogul delivers the flexibility and scalability to support virtually any subscription business model.

Multiple billing systems PLG models Add-ons & usage fees Multi-currency

Multiple billing systems

ChartMogul supports multiple billing systems, whether for different customer groups or during a migration. We automatically connect subscriptions across systems to maintain accurate timelines and smooth MRR reporting for each customer.

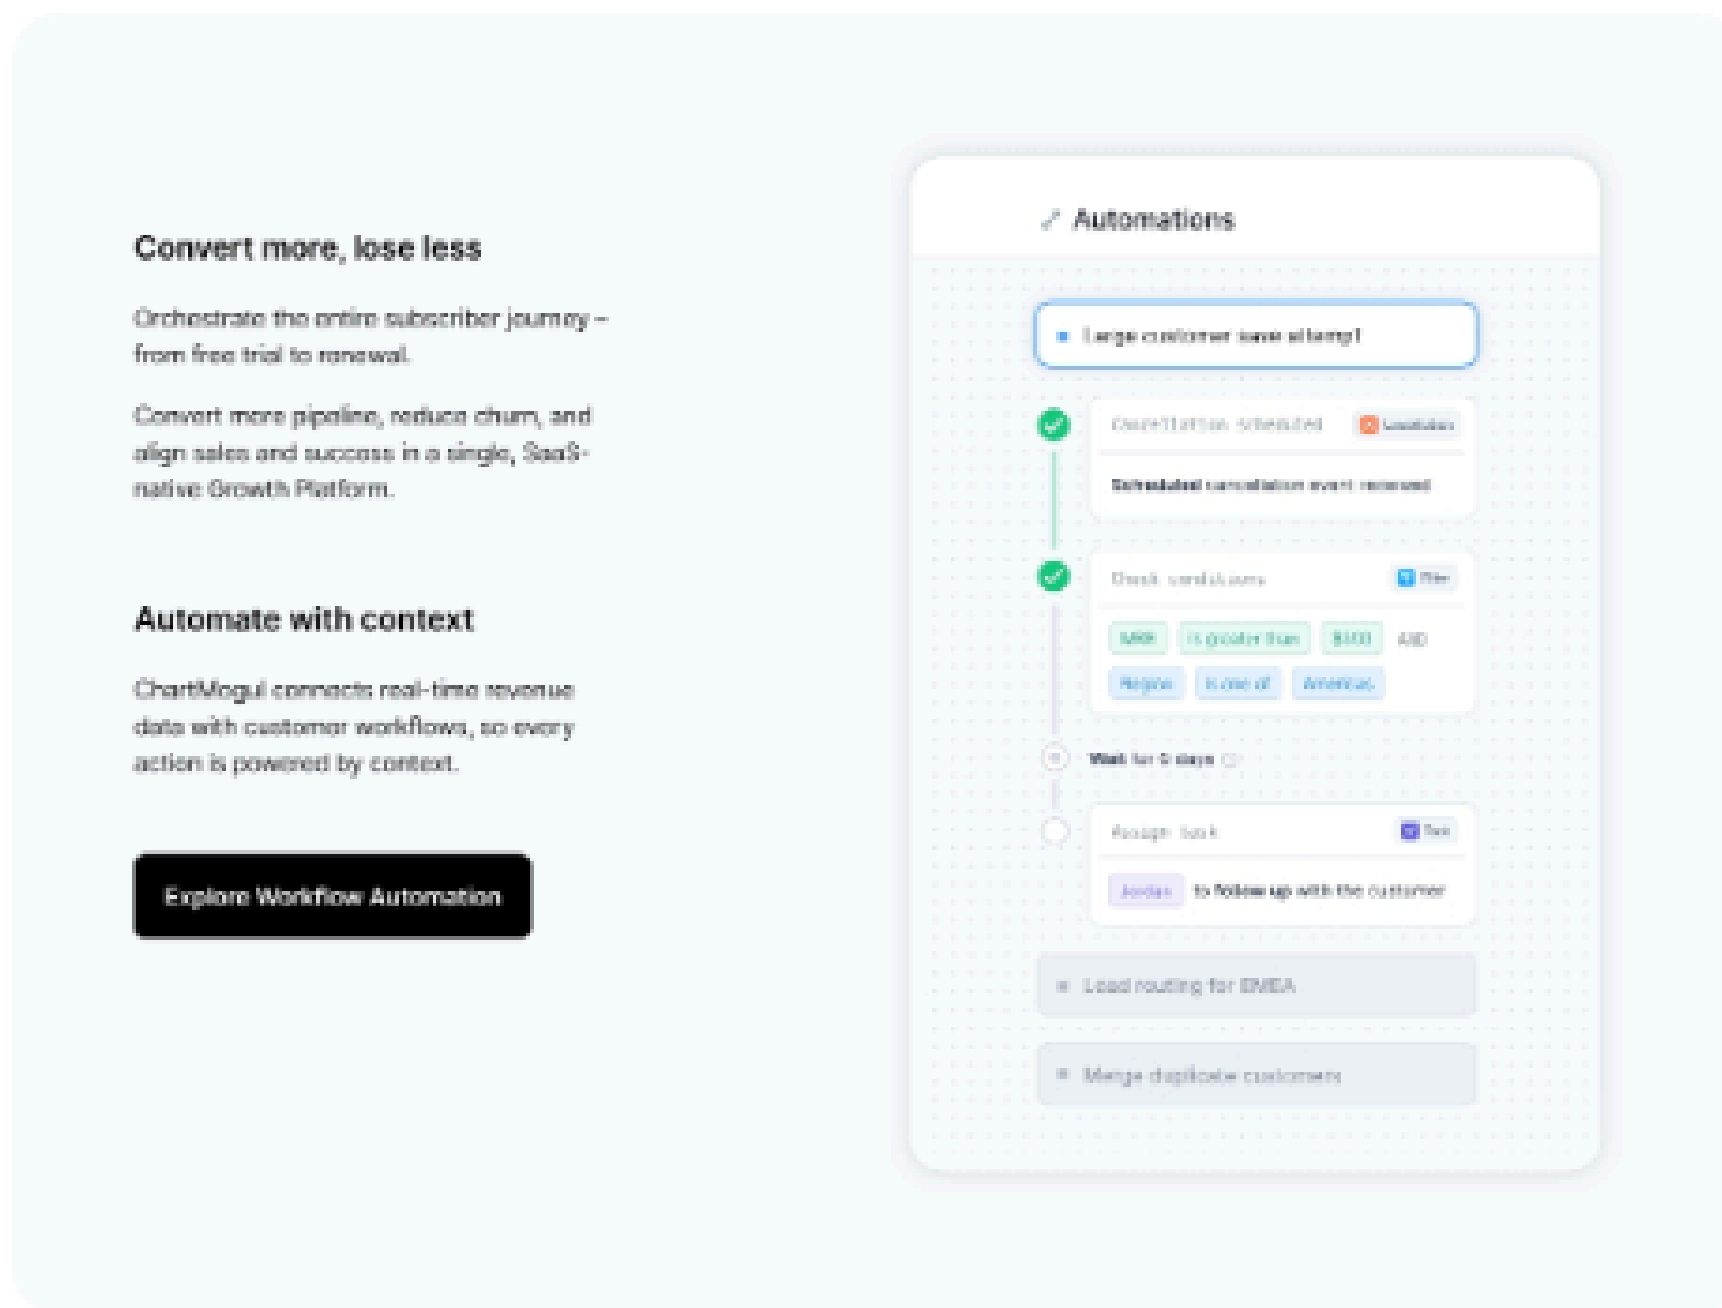

Integrates into the modern SaaS stack

Your data lives across tools, products, and data warehouses. ChartMogul brings it all together – connecting billing, usage, and marketing data into a unified view of your subscription business.

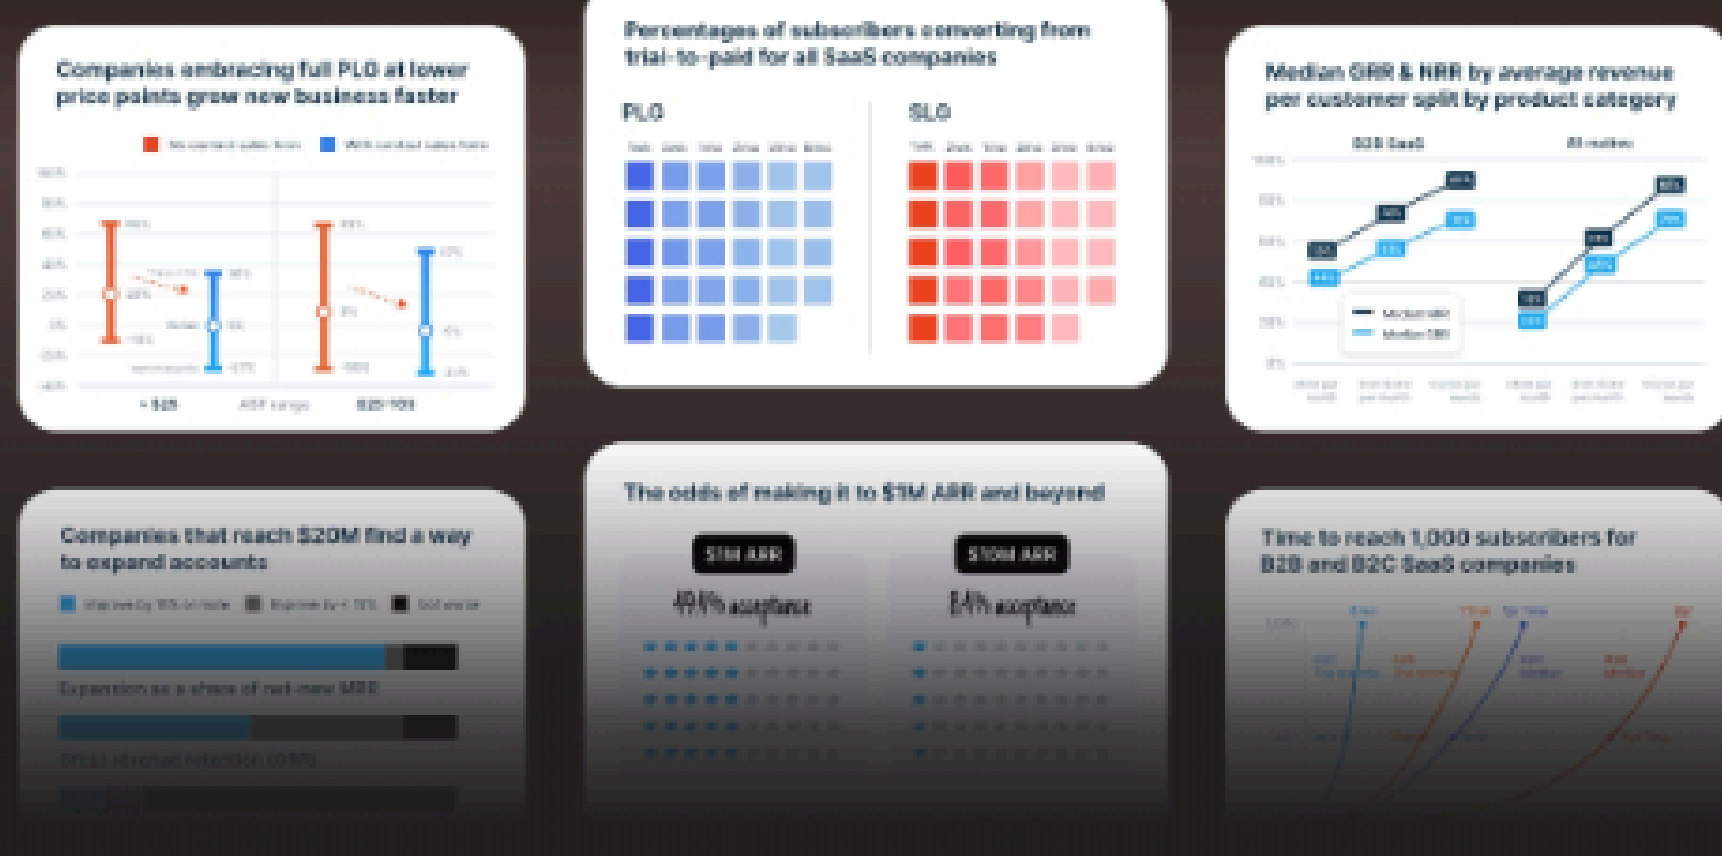

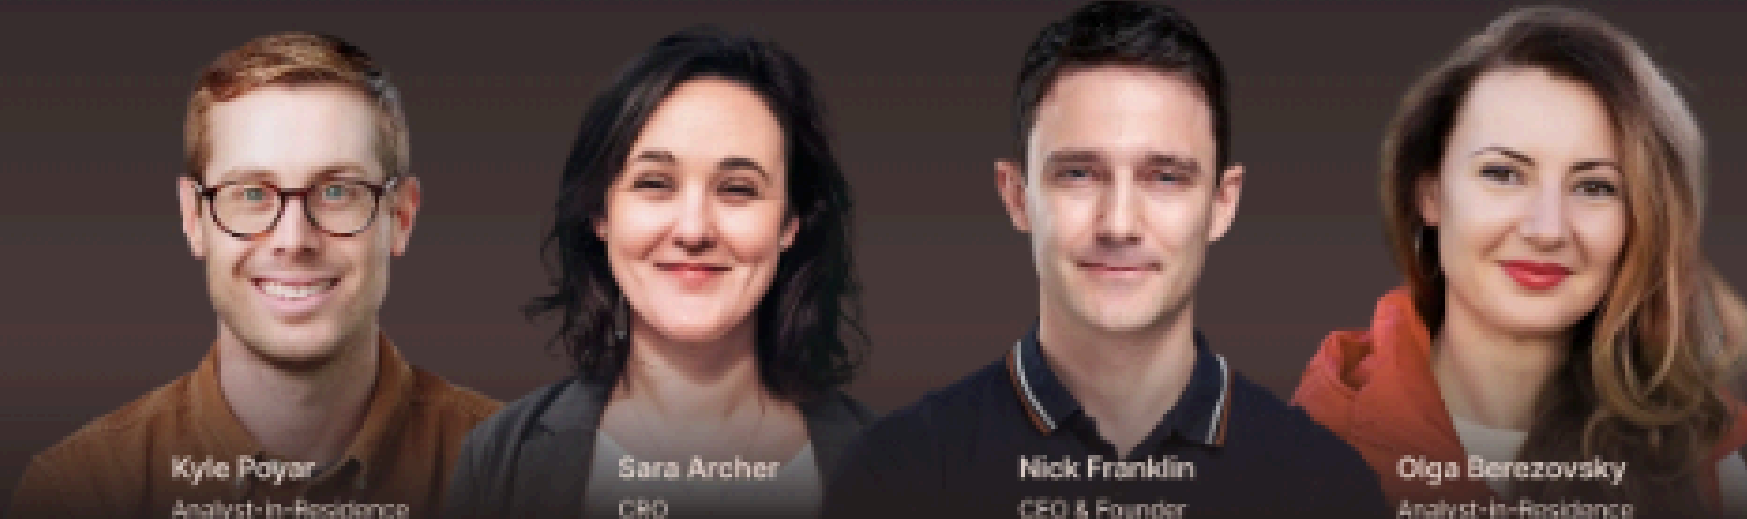

Metrics don't grow your business. Action does.

Trigger workflows from subscription events to convert more revenue and reduce churn.

The ChartMogul Standard

Where the SaaS world measures success. ChartMogul is more than software – it's the center of excellence for SaaS metrics, forecasting, and benchmarks. Our data and insights help founders and operators understand how they stack up and where to grow next.
